## MERN Stack Developer

Passionate and skilled MERN Stack Developer with 2 years of experience in modern web development. Proficient in building dynamic, responsive, and scalable web applications using React, Node.js, MongoDB, and Express. Dedicated to writing clean code and creating optimized user experiences.

---

## Technical Skills (MERN Stack)

- **Frontend:** React.js, Redux, Tailwind CSS, Thunder
  - **Backend:** Node.js, Express.js, Socket.io
  - **Database:** MongoDB (Mongoose)
- 

## Key Projects

- **Netflix Clone (MERN Stack)**
  - Built a responsive Netflix clone with user authentication using MongoDB.
  - Integrated TMDB API and implemented real-time search with Redux.
- **DeepSeek AI Assistant Clone (MERN Stack + OpenAI API)**
  - Created an AI-based web app where users can input prompts and receive responses via the OpenAI API.
  - Implemented user authentication (Signup/Login) using JWT and MongoDB.
  - Saved chat history to MongoDB; used Redux for state management and Tailwind CSS for modern UI design.

- **Gym Management System**

- Developed a modern Gym web application for managing memberships, trainers, and workout plans.
- Included features like member registration, login, and workout tracking.
- Built using MERN stack with Tailwind CSS and Redux for smooth UI and data flow.

- **Portfolio Website (Personal Project)**

- Designed and developed a professional portfolio to showcase web development skills.
- Built using React, Tailwind CSS, and deployed on a custom domain.
- Includes sections like About, Projects, Contact, and integrated animations for better UX.

---

## Education

### **B.S. in Information Technology**

Baba Guru Nanak University (*In Progress*)

---
